Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments filed 9/10/03 have been fully considered but they are not persuasive. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sonntag et al (5,780,981).

As per claim 1, Sonntag discloses:

- determining a performance setpoint value for the electric drive motor from an accelerator pedal position (column 2, lines 59-65); and
- making a power request to the power-generating system before a torque request to the drive motor (column 3, line 14-25);
- wherein the accelerator pedal movement is additionally used to calculate the performance setpoint value (column 4, lines 14-20).

Sonntag does not teach in addition to the accelerator pedal position, the pedal movement to calculate the performance setpoint value. However, it would have been obvious to one of

Art Unit: 3661

ordinary skill in the art, since it has been held that omission of an element and its function in combination where the remaining elements perform the same functions as before involves only routine skill in the art. In re Karlson, 136 USPQ 184.

As per claim 11, Sonntag discloses a fuel cell system as a power-generating system (abstract).

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sonntag et al (5,780,981).

As per claim 1, Adler discloses:

- determining a performance setpoint value for the electric drive motor from an accelerator pedal position (column 7, lines 22-28); and
- making a power request to the power-generating system before a torque request to the drive motor (column 8, line 60-65);
- wherein the accelerator pedal movement is additionally used to calculate the performance setpoint value (column 7, lines 45-50).

Adler does not teach in addition to the accelerator pedal position, the pedal movement to calculate the performance setpoint value. However, it would have been obvious to one of ordinary skill in the art, since it has been held that omission of an element and its function in combination where the remaining elements perform the same functions as before involves only routine skill in the art. In re Karlson, 136 USPQ 184.

Allowable Subject Matter

4. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
